

Summary of Terms

Horizon Receivables Trust 2025-A (the “Issuer”) will issue USD 300,000,000 of asset-backed notes collateralized by a revolving pool of consumer installment receivables originated by Horizon Financial Services.¹ The Class A-1 notes bear interest at 5.20 percent and the Class A-2 notes at 5.55 percent per annum. The expected final maturity is September 2030.

The receivables have a weighted average annual percentage rate of 14.8 percent and a weighted average remaining term of 48 months. The pool is geographically diversified with no state exceeding 12 percent of the aggregate principal balance.²

Credit Enhancement

Credit enhancement consists of overcollateralization initially equal to 8.00 percent of the pool balance, a reserve account funded at 2.00 percent, and subordination. The overcollateralization target steps up to 11.00 percent upon a breach of the cumulative net loss trigger, which is set at 6.50 percent for the 2026 collection periods.

Collection Period	Pool Balance (USD)	CNL Ratio	OC %
Jan 2026	292,400,000	0.42%	8.10%
Feb 2026	285,100,000	0.71%	8.24%
Mar 2026	277,900,000	1.03%	8.39%
Apr 2026	270,800,000	1.44%	8.55%
May 2026	263,700,000	1.92%	8.72%
Jun 2026	256,600,000	2.41%	8.90%
Jul 2026	249,500,000	2.98%	9.09%
Aug 2026	242,400,000	3.55%	9.29%

Servicing

Horizon Financial Services will act as servicer and will be entitled to a servicing fee equal to 1.25 percent per annum of the outstanding pool balance. A backup servicer, Cornerstone Administration LLC, will assume servicing within 45 days of a servicer default.
